Frederick, Maryland 21701

Dear Mr. Weisberg,

I have followed the history of the Kennedy assassination for many years. I have read your first publication Whitewash I. I have seen you on a different numbers of T.V. shows. One particularly was a show on WNEW TV back in 1965 or there abouts. You appeared with Mark Lane and a panel of 4 other people. I am anxious to obtain transcripts of this program. Would you have any means of aquiring this for me. I have contacted the TV station but have never received any response.

I have also heard occasionaly that you are involved in a law suit under the freedom of

you are working on from the National Archives? Specifically, I want to find out about the autopsy. Will it ever be released? Also, are efforts being made to secure the location of the Brain? Also I would like to find out when (if a) Mrs. Kennedy's testimony in front of the Warren Commission will be released?

I recall that Dr. Cyril Wecht said that the brain was missing. But could the autopsy information provide the necessary information to prove a multiple fire crossfire?

I really would like to be more informed about the assassination. Could you direct me towards some different sources of information that would help me be a more qualified researcher. I have tried to locate copies of the original Warren Report. However, I was only able to locate 2 copies - one in Washington - for sale for $500, which I have no means to pay for and one in New York with a missing

Well I thank you for your response which I anxiously await.

Very Truly Yours.
Robert G Parker
